

Research Collaboration in Asia LIS Schools -- Experience of the Asia Library and Information Research Group (ALIRG)

Hao-Ren Ke
Professor and Chairperson of
Graduate Institute of Library and Information Studies,
National Taiwan Normal University (NTNU)

Outline

- ▶ Introduction
- ▶ Workshop Review
- ▶ Research Collaboration Outcomes
- ▶ Keys to International Research Collaboration
- ▶ Conclusion

INTRODUCTION

Background

- ▶ We know a lot about our western LIS colleagues, but how about our Asian colleagues?
 - ✿ Similar culture, society, value systems, ...
- ▶ Taiwan-Singapore-Thailand LIS Research Group
 - ✿ Taiwan: National Taiwan Normal University
 - ✿ Singapore: Nanyang Technological University
 - ✿ Thailand: Khon Kaen University, Mahasarakham University

Background (Cont.)

TST LIS Workshop

- ▶ The Taiwan-Singapore-Thailand Workshop series on Library and Information Science (LIS) Research
 - ✿ 1st: National Taiwan Normal University (Sep 2008)
 - ✿ 2nd: Khon Kaen University (Thailand) (Nov 2009)
 - ✿ 3rd: Nanyang Technological University (Singapore) (Jan 2011)
 - ✿ 4th: National Taiwan Normal University (Mar 2012)
- ▶ Change name to *Workshop of the Asia Library and Information Research Group* from 2012

Objectives

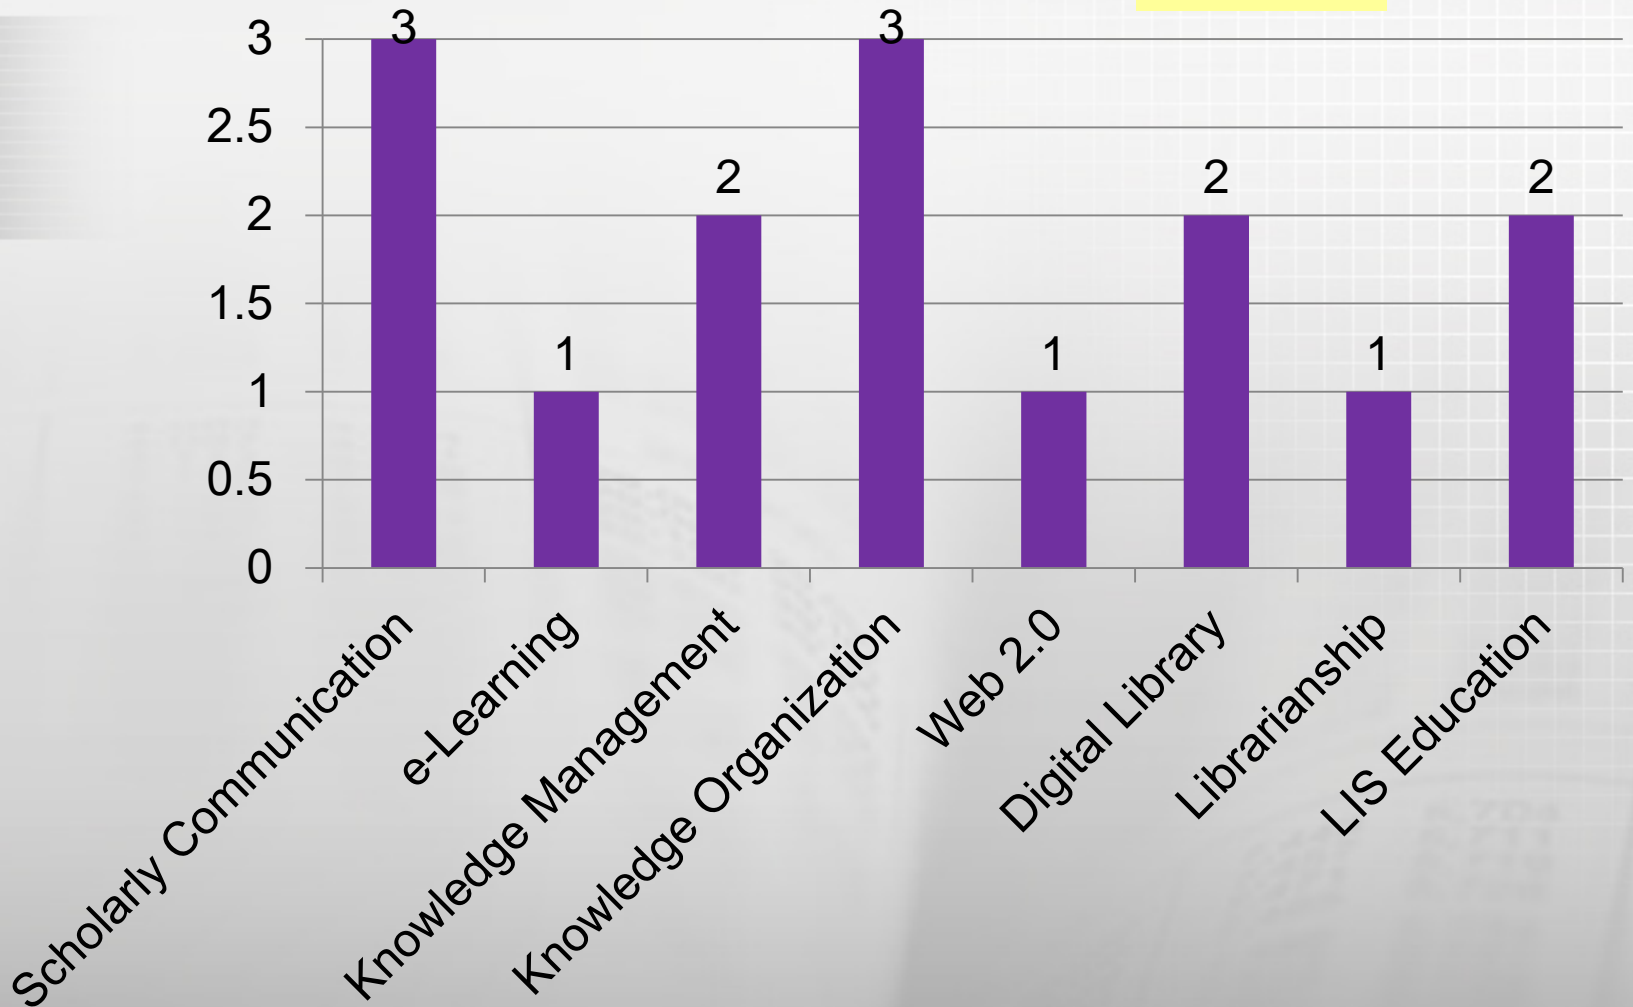

- ▶ To initiate and carry out regional collaborative projects
- ▶ To establish regional library and information research groups
- ▶ To obtain expert feedback on current research studies
- ▶ To provide an opportunity for PhD students to network, and to obtain feedback on their research

WORKSHOP REVIEW

1st Workshop – Subject Coverage

Total = 15

1st Workshop – Collaborative Group

- ▶ Information/knowledge organization, Digital Library and archives
- ▶ Education & e-learning
- ▶ Research communities (Scholarly Communication & Collaboration)
- ▶ Library management, service and system

1st Workshop – Participants

Total = 34

Photos of 1st Workshop

2nd Workshop – Subject Coverage

Total = 20

2nd Workshop – Collaborative Group

- ▶ E-learning / teaching methods in LIS
- ▶ Digital libraries / archives
- ▶ Reading / information literacy
- ▶ Scholarly Communication
- ▶ Knowledge management / organization

2nd Workshop – Participants

Total = 115

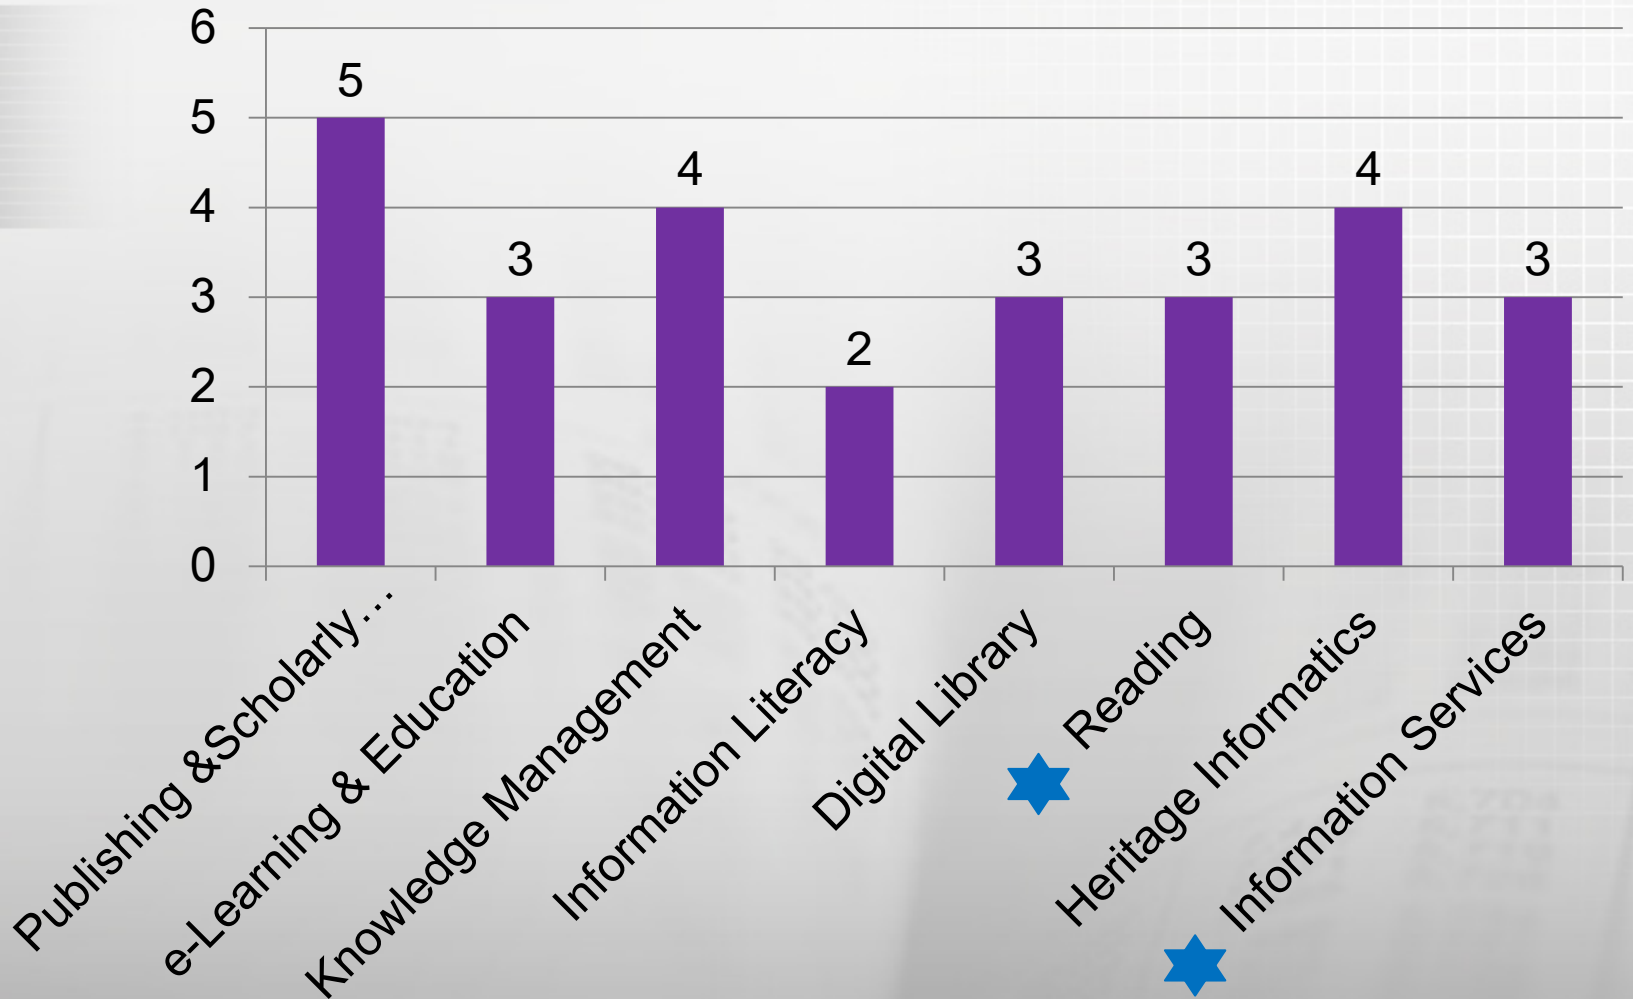

Photos of 2nd Workshop

3rd Workshop – Subject Coverage

Total = 27

3rd Workshop – Collaborative Group

- ▶ Reading
- ▶ Knowledge Management
- ▶ Developments in Information Service
- ▶ E-Learning & Education
- ▶ Publishing & Scholarly Communication
- ▶ Heritage Informatics
- ▶ Information Literacy
- ▶ Digital Libraries

3rd Workshop – Participants

Total = 59

Photos of 3rd Workshop

4th Workshop – Subject Coverage

Total = 30

4th Workshop – Collaborative Group

- ▶ Digital Libraries
- ▶ Reading & Information Literacy
- ▶ Information Societies
- ▶ Knowledge Organization
- ▶ Heritage Informatics
- ▶ Open Access & Scholarly Communication
- ▶ Web 2.0 in Information Services
- ▶ Knowledge Management

4th Workshop – Participants

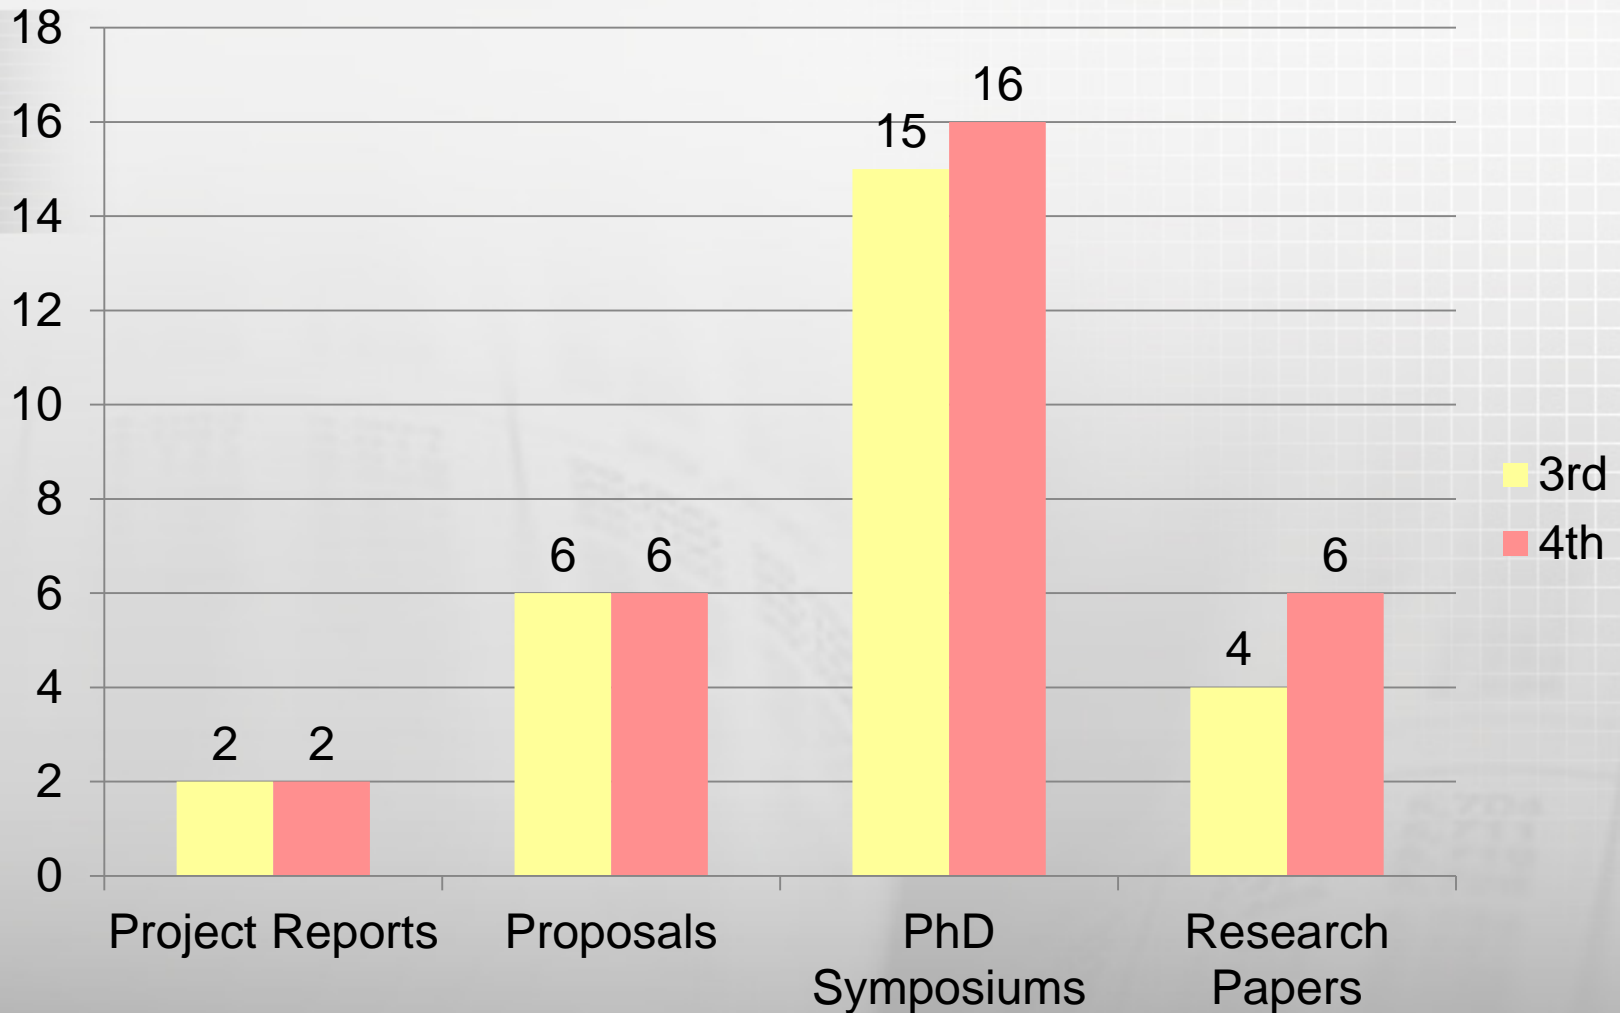

Total = 89

Photos of 4th Workshop

Project Reports / Regional Collaboration Proposals

RESEARCH COLLABORATION OUTCOMES

Research Collaboration

- ▶ Factors affecting re-usability of learning objects: a collaborative case study of two subject areas in LIS
 - ✿ Kuwait, Singapore, Taiwan, Thailand
- ▶ The information needs of end-users of digitized collections of cultural heritage resources
 - ✿ Singapore, Thailand

Research Collaboration (Cont.)

- ▶ Metadata Schema Development for Digital Thai Ancient Document Collection
 - ✿ Japan, Thailand
- ▶ Launching of a New OA Journal in LIS: A Case of Asia Pacific Journal of Library and Information Science (APJLIS)
 - ✿ Thailand
 - ✿ 13 editorial board members from India, Malaysia, Singapore, Thailand, USA

Asia Pacific Journal of Library and Information Science

Keys to International Research Collaboration (IRC)

Research Collaboration

- ▶ Within the last decades knowledge production underwent radical changes
- ▶ **Research collaboration (RC)** has become a necessity due to the enormous pressure scientists, institutions or even countries face in their daily struggles to meet the required publication output requirements
- ▶ The number of internationally co-authored papers is abruptly increasing, and an intensification of RC is reported at all aggregation levels

Maria Benavent-Perez, Juan Gorraiz, Christian Gumpengerger, Felix de Moya-angeon (2012)

International Research Collaboration

- ▶ International research collaboration is a crucial , complex, and fragile process
- ▶ Effective strategies are needed to manage the inevitable conflicts that arise
- ▶ Promoting collaborative dialogue, taking time, and developing trust are discussed as strategies to support a fuller international engagement

IRC Roadblocks and Strategies

Roadblocks to Effective International Teamwork

Ambivalence and uncertainty

Individuals promoting self-interests by working competitively or independently

Strategies to Counteract the Roadblocks and Enhance Effective International Teamwork for Research

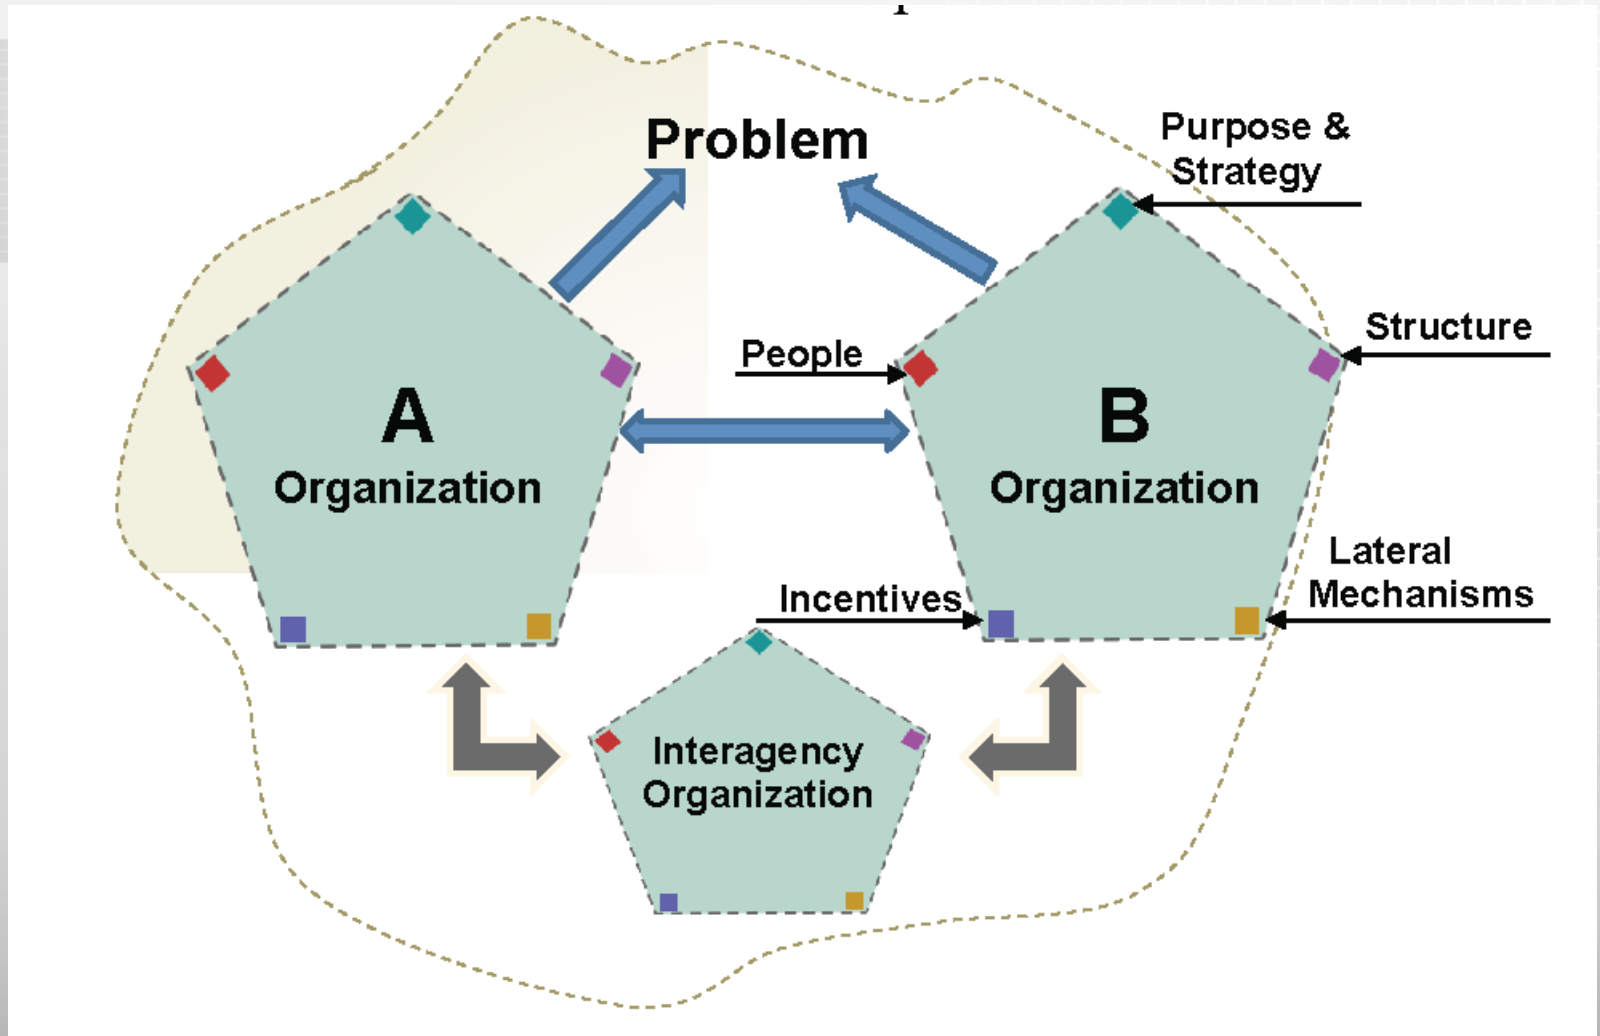

- Develop an inspiring or motivating shared vision
- Establish clear goals and objectives
- Develop clear norms
- Provide access to information and a shared knowledge base to enhance common understanding
- Acknowledge diversity and develop cooperative, shared goals
- Take time and develop trust
- Practice collaborative dialogue
- Empower and recognize all team members' abilities, resources, and strengths
- Focus on the individual and team benefits of mutual, cooperative work
- Share ownership of and responsibility for decisions
- Appreciate all accomplishments

IRC Roadblocks and Strategies (Cont.)

Dynamics that reinforce biases and simplifications: for example “groupthink,” domination of individual views, demands for conformity, or coalitions formed to promote special interests

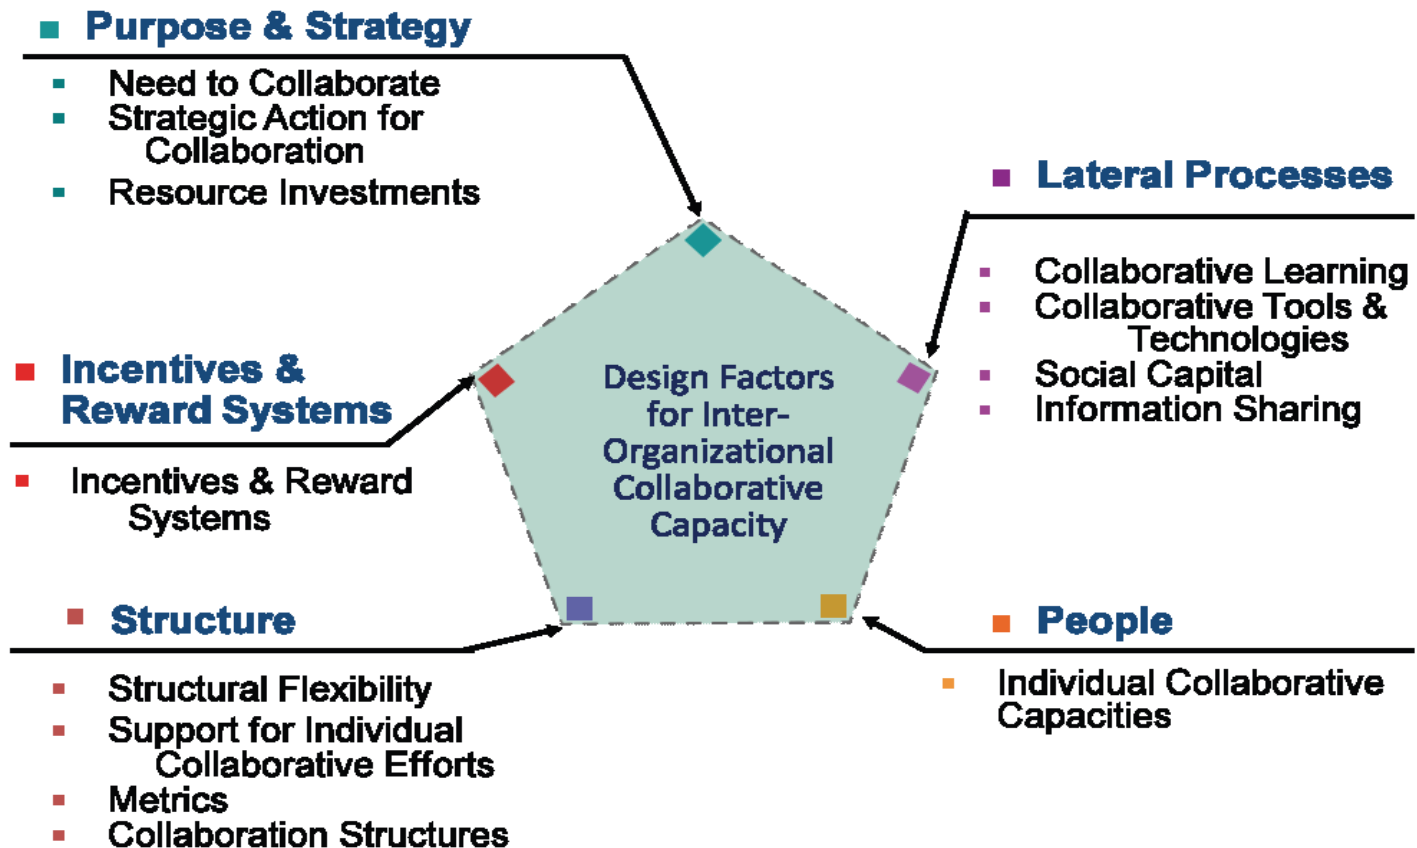

- Practice self-reflection and reflexivity
- Expose and challenge stereotypes and respect cultural differences and diversity
- Directly and openly confront relationship issues and conflicts as they arise
- Engage in constructive, open-minded controversy, explore opposing views, positions, and issues, identify common ground, and generate options and alternatives
- Be open to new information and ideas and willing to integrate or incorporate different perspectives, ideas, positions, or minority views into effective solutions
- Continuously search for opportunities for innovation and be willing to take risks
- Be flexible and adaptable when situations change
- Communicate for continuous improvement and development

Inter-organizational collaborative Capacity (ICC) Model

Inter-organizational collaborative Capacity (ICC) Model (Cont.)

Organizational Domains & Factors

Five Domains of ICC Model

- ▶ Purpose & Strategy
- ▶ Structure
- ▶ Incentives and Reward Systems
- ▶ Lateral Mechanisms
- ▶ People

Factors of ICC Model

▶ People & Strategy

✿ Felt need to collaborate

- ✓ Recognition of interdependence with others
- ✓ Acknowledged need to collaborate in order to effectively accomplish its mission and goals

✿ Strategic for collaboration

- ✓ Goals for collaboration
- ✓ Demonstrated senior leadership commitment
- ✓ Willingness to consider other organizations' interests in planning

✿ Resource investment

- ✓ Personnel and budget

Factors of ICC Model (Cont.)

▶ Structure

- ✿ Structural flexibility for collaboration
- ✿ Support for individual collaborative efforts
 - ✓ How clearly individual collaborative work is structured in terms of clear goals, constraints, and authorities
 - ✓ The strength of the link between personnel in boundary spanning roles working directly with other organizations and the strategic leadership of their own organization
- ✿ Metrics for assessing outcome
- ✿ Collaboration structures
 - ✓ Liaison roles
 - ✓ Task forces
 - ✓ Roles for each participating organization
 - ✓ Internal process enabling collaboration

Factors of ICC Model (Cont.)

▶ Incentives and Reward Systems

▶ Lateral Mechanisms

- ✿ Social capital for awareness and trust building

- ✿ Collaborative tools & technology

 - ✓ Interoperable information systems and collaborative planning tools

- ✿ Collaborative learning

 - ✓ Joint learning, workshop,

- ✿ Information sharing

▶ People

- ✿ Individual collaborative capacities

CONCLUSIONS

Conclusions

▶ Preliminary Achievements

- ✿ Develop the most important ingredients of IRC: trust, friendship, hospitality, social skill
- ✿ The number of presentations has doubled
- ✿ A small number of regional collaboration projects
- ✿ Increasing number of Ph.D. students join the workshop to present and build their social ties

▶ The future...

Future of ALIRG

▶ 5th: Mahasarakham University (Thailand) (Jul 2013)

▶ Actions

- ✿ Communicate via social media
 - ✓ Mailing list ('LI_RESEARCHGROUPS@MLIST.NTU.EDU.SG')
 - ✓ Facebook group
- ✿ Experienced faculty should encourage young faculty and Ph. D. students
- ✿ Sign student/faculty exchange
- ✿ Start to read and cite papers from our Asian colleagues

Suggestions for ALIRG

From Rama Reddy Erukonda

- ▶ Encouraging and bringing the Research Scholars in LIS together at the ALIRG workshop platform.
- ▶ The peer interaction, communication, establishing trust, understanding areas of interest, and understanding information gathering and management.
- ▶ Identifying the common areas of interest, creating road map and timeline for collaboration.
- ▶ Sharing the responsibilities, constant interaction while following the road map.

Suggestions for ALIRG (Cont.)

- ▶ Collaborative research can be initiated at individual level or institutional level.
- ▶ Collaborative authorship within and between the nations is the future of research In LIS
- ▶ Funding agencies will support such proposals
- ▶ Asia LIS Research activities should be visible to the rest of the World which could open up collaborations at Global level
- ▶ Asia Research visibility rests on the submission of publications in Open Access journals/platforms
